

*Dear Singers: Have you got the no-concert blues?*

**Join Roland Perrin's virtual choir fun factory this November**

Sing, record and create a **music video** of one of Roland's pieces from the new suite:

*'Can't Cancel Christmas'*

The suite comprises **5 choral songs** stylistically ranging from Latino and Afro-jazz to Klezmer. Each piece is 4-5 minutes in length.

**Here's the fun bit.** Sign up to the project and you will join other singers in **5 one-hour virtual group workshops** with the composer – each focusing on a different song from the suite.

You will then vote as a choir for the song you would most like to create.

**Then it's time to shine.** The backing track for the chosen song will be sent to you, and you will record your part on your phone twice ... once with headphones – for the audio, and once without headphones – for the visual.

Leave it to us to put the audio and film together and produce a high quality, **professional standard music video** (example below) that will be yours to enjoy, keep and share freely in time for the festive season.

Price

To participate in 5 workshop sessions and help create a memorable 4-5 minute music video: just **£25** per person.
